

(a) Structural overlap

□ M_f
□ M_r
□ $S_{share} = M_f \cap M_r$

One fixed mask grid is reused
in all three panels.

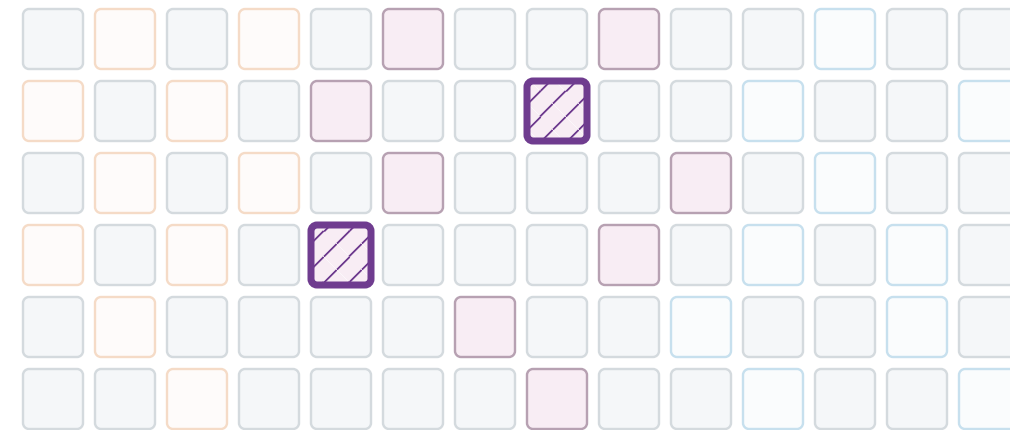

(b) Retention sensitivity

low q_i □ □ □ □ □ high q_i

$q_i = |\nabla_i L_{retain}|$ is evaluated
only on S_{share} .

(c) Critical subset

□ $S_{crit} = Top-\rho(S_{share}; q_i)$

$\rho = 0.2$

$S_{crit} \subset S_{share}$ by construction
